## Financial KPI Definitions

|                            |  |
|----------------------------|--|
| <b>Adjusted EBIT</b>       | Earnings before financial result and taxes, after adjustments. Earnings indicator showing Evonik's operating earnings performance irrespective of the structure of its assets.   |
| <b>Adjusted EBITDA</b>     | Earnings before financial result, taxes, depreciation and amortization, after adjustments. Earnings indicator showing Evonik's operating earnings performance irrespective of the structure of its assets and its investment profile. This is a cash flow-related indicator which is used in particular in the adjusted EBITDA margin to show the relationship to sales as a basis for comparison with competitors.  |
| <b>Adjusted net income</b> | We use adjusted net income to assess the earnings power of the continuing operations, especially on a long-term view, and to forecast future development. The calculation starts from EBITDA after adjustment for special items. The financial result is then adjusted for income and expenses in connection with the acquisition/divestment of shareholdings and other income and expense items that, by nature or amount, do not form part of typical current financing activities. Further, we deduct amortization of intangible assets, as they mainly result from acquisitions, and adjust income tax for taxes on special items. |
| <b>Adjustments</b>         | Evonik refers to the special items that are factored out when calculating the operational performance indicators adjusted EBITDA and adjusted EBIT as adjustments. They include restructuring, impairment losses/reversals of impairment losses, income and expenses in connection with the purchase/disposal of investments in companies, and other income and expense items that, due to their nature or amount, do not reflect the typical operating business.  |
| <b>Free Cash Flow</b>      | The free cash flow is a measure of the company's internal financing capacity. It shows the cash that is available to pay dividends, make acquisitions and repay borrowing. The free cash flow is calculated from the cash flow from operating activities, continuing operations, less outflows for capital expenditures on intangible assets, property, plant and equipment.   |
| <b>ROCE</b>                | The return on capital employed is a measure of the profitability of capital employed. It is calculated by dividing adjusted EBIT by the average capital employed in the reporting period.  |

## ESG KPI Definitions

|   |  |
|---|--|
| <b>Value added in € million</b>   | We use an impact valuation to regularly measure and analyze the direct and indirect impacts from an economic, ecological, and social perspective. This supplements our established analytical approaches. We anticipate that this will allow early identification of potential future opportunities and risks, make our business model more resilient, and improve understanding of the long-term value that our business activities create for society. We aim to assign a monetary value to individual indicators such as continuing development of employees, employment impacts, and global warming so they can be compared. Most of the factors used for this are publicly available. |
| <b>Sales share with "Next Generation Solutions"</b>                           | Sales share of products with superior sustainability benefits to customers ("Next Generation Solutions"); derived from sustainability analysis of our businesses based on the principles and content of the WBCSD Portfolio Sustainability Assessments (PSA)<br>For more information please see Evonik website:<br>Responsibility - Value Chain & Products - Sustainability Analysis   |
| <b>Internal Investigations</b>  | Internal investigations are initiated when there is a suspected violation of compliance rules (including the code of conduct, antitrust law and the rules on fighting and preventing corruption). Since 2018, the scope of reporting has covered all internal investigations in the Evonik Group. Before that, only the areas covered by the House of Compliance were included.  |
| <b>Disciplinary Measures</b>  | Disciplinary measures are taken as a result of an internal investigation. A disciplinary measure can result in an employee's dismissal, warning or reprimand, transfer to a different position or further awareness enhancement. In rare cases, legal proceedings (civil or criminal) had to be initiated.   |
| <b>Raw Material Suppliers Covered by TFS Assessments</b>                      | This number indicates how many raw material suppliers have been covered by TFS assessments in that year. The chemical industry set up the Together for Sustainability (TFS) initiative in 2011 with the goal to harmonize global standards in the supply chain to create transparency and make it easier for both suppliers and customers to reliably assess and evaluate sustainability performance. This includes assessing the suppliers' quality, grade of environmental protection, safety, health, energy management, the assessment of potential risk factors. Evonik is one of the founding members of this initiative.  |
| <b>Greenhouse Gas Emissions</b>   | Scope 1: Evonik's direct energy and process-related emissions;<br>Scope 2: Purchased energy (net, total purchased power and steam - sale of power and steam to third parties; market-based approach);<br>Scope 3: Indirect emissions, including emissions from the production of purchased raw materials, packaging materials, capital goods, energy-related emissions outside scopes 1 and 2, emissions from inbound shipments of raw materials, from the disposal of production waste, business trips, commuting by employees, Evonik's fleet of vehicles, energy requirements for offices and emissions from the disposal and recycling of products sold.                               |
| <b>Early Employee Turnover</b>  | Turnover of newly hired employees within the first year of employment  |
| <b>Management circles/ levels</b>   | Management circle 1 = executive functions, i.e., top management functions in the Evonik Group<br>Management circle 2 = senior management functions, i.e., key functions in the divisions, regions, service units, and corporate functions<br>Management circle 3 = further management functions  |
| <b>Occupational Health Performance Index</b>                                  | This index shows the extent to which internal requirements have been implemented and goals achieved. It is calculated from two parameters from each of the following areas: occupational medicine, health promotion and emergency medical management. Both the quality and the scope of the measures are taken into account. The index is calculated annually.   |
| <b>Specific water intake</b> in m3<br>freshwater per metric ton<br>production | Freshwater usage in relation to production.  |
| <b>Total water intake</b>   | Evonik's consumption of freshwater is the total of drinking water, groundwater, surface water, and recycled water. Total water intake is the sum of total freshwater and salt water (sea water).   |
