

BECAUSE IT'S ABOUT **TIMING**

Determine the nutritional quality of your feeds and raw materials – fast, reliably, and at the best quality.

AMINONIR®

 **EVONIK**
Leading Beyond Chemistry

AMINONIR® ADVANCED

Optimize feed specification and control feed cost with highest quality and speed

Reliable nutrition analysis in minimum time – even with unground raw materials.

Easy to perform, fast to implement, invaluable for business performance.

It covers the largest number of feed ingredients used by the feed industry.

CERTIFIED QUALITY
MANAGEMENT

1 Take a sample

AMINONIR® Advanced supports a huge variety of raw materials and finished feeds that can be scanned in order to receive detailed information about their nutritional values. There is no need to prepare the sample – simply take it as it is.

Scan the unground sample as it is 2

Only with AMINONIR® Advanced: Fill the sample into the NIR cup as it is – no need to grind. Evonik's technology can still analyze the sample with prediction errors almost as low as ground calibrations.

AMINONIR® Advanced 3.0

Dr. Ralf Reimann. To start a new analysis process please upload NIR files at your computer.

File uploads

Files successfully processed.

Thank you for using AMINONIR® Advanced 3.0!

3 Upload your data

Uploading is as easy as scanning. Within seconds, you can transfer the data by Web browser or via AMINONIR® Web service interface. There's no need to select any material types or input complicated data.

4

High quality feed ingredient data for most accurate feed formulation

You'll find everything you need to know about your raw materials or finished feeds in one detailed report. The calibration fact sheets inform you about origin of calibration samples, parameters, statistics, and much more.
