

Plant list: Fruits & vegetables

The following list contains fruits & vegetables

The fruit of a plant is the totality of the organs, which originate from a flower and which surround the plant seeds to their maturity. Vegetables are a collective term for edible parts of plants growing wild or cultivated. Fruits and vegetables contain many vitamins and minerals.

Botanica processes the corresponding plants into extracts which are available in different carrier substances (water-soluble, oil-soluble etc.) – see extract finder. These extracts can be used for cosmetic and technical purposes.

Botanica neither performs nor commissions tests on animals. Our raw materials are natural and can vary slightly from harvest to harvest without affecting the quality of the product. Further information can be found in the corresponding specification.

Please note that certain plants are not available all year round. Please ask us about the availability.

This list is not exhaustive and only represents some of the plants we process. If you are looking for other specific extracts to use in your formulation, we look forward to hearing from you.

English	Deutsch	Français	Latin	Bio
Agave	Agave	Agave	Agave Tequilana	Bio
Almond	Mandel	Amande	Prunus Dulcis	Bio
Apple	Apfel	Pomme	Malus Domestica	Bio
