Optimized nutrition for **BETTER PET HE**

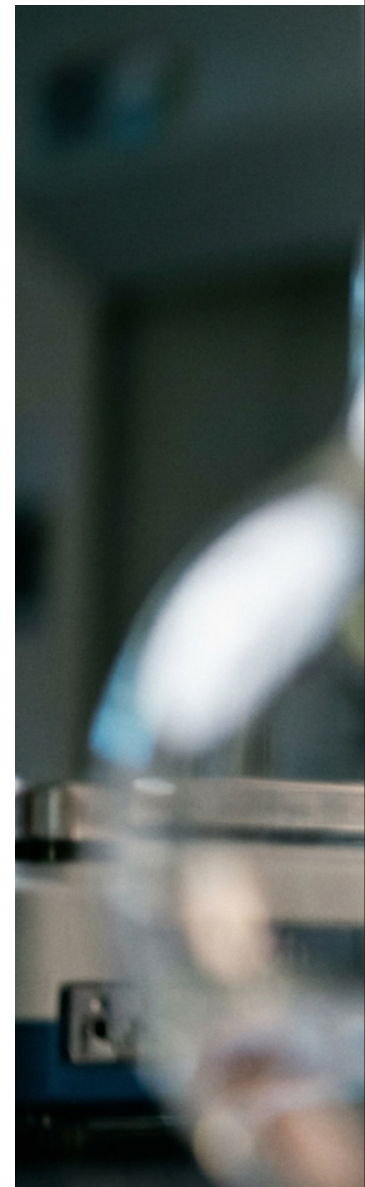

Our Product Portfolio for Companion Animals

Because the impact of balanced nutrition becomes visible in the moments we share with them every day. **How do we know how our pets truly feel?** Not through words, but through their eyes, their expressions, and the subtle reactions that reveal what balanced nutrition can make visible: genuine wellbeing.

A relaxed gaze, a joyful movement, or a quiet moment of contentment can say more than words ever could. Behind these moments are carefully developed nutritional solutions that help enhance the quality and functionality of animal nutrition products.

Our portfolio brings together science, expertise, and a deep understanding of the needs of companion animals. Each solution is developed with the aim of supporting products that contribute to a balanced and enjoyable everyday life. Because when science works in the background, wellbeing becomes visible in the foreground. And sometimes, one look is all it takes to see the difference.

Your partner in advanced
PET NUTRI

TION

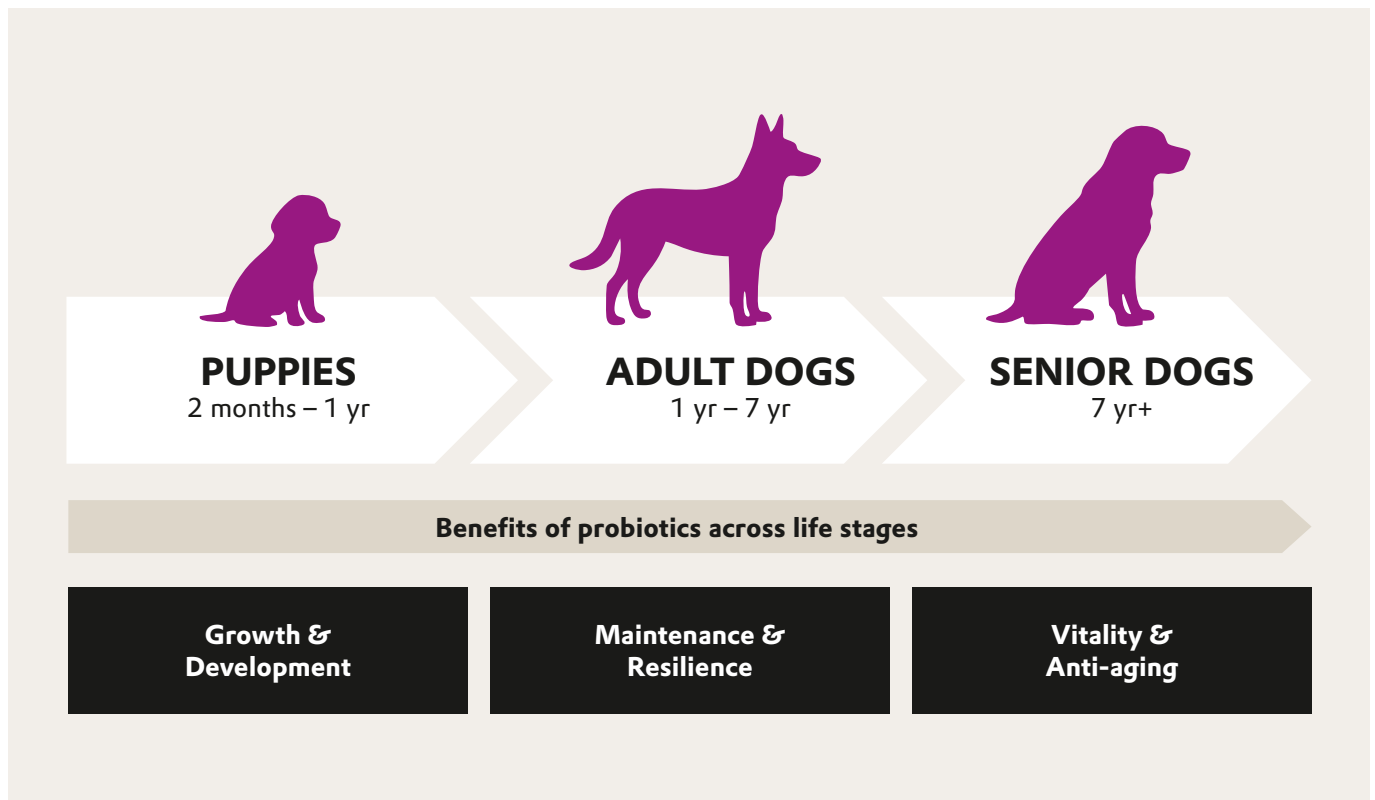

Evonik combines scientific expertise, global industrial capability, and application expertise to support pet food manufacturers globally.

Challenge

- **Deep expertise in amino acids and gut-health science**
Decades of experience in nutrition and functional ingredients
- **Integrated portfolio approach**
Combining multiple technologies to deliver system-level benefits
- **Global production and supply security**
Consistent quality and availability across regions
- **Application and technical support**
Supporting formulation, processing, and product development
- **Commitment to innovation and sustainability**
Continuous development of solutions aligned with future market needs

Partner with Evonik to deliver better pet nutrition — from formulation to final product performance. By connecting nutrition and gut-health, we enable more consistent, reliable results in pet food.

Meeting the increasing demands of **MODERN PET**

Pet food manufacturers are under increasing pressure to deliver more

- Proven health benefits such as gut-health, skin and coat, and immunity
- Consistent product performance across formats and production conditions
- Rising expectations of pet owners
- Improved sustainability and resource efficiency

At the same time, formulation is becoming more complex due to variable raw materials, the growing use of plant-based ingredients, and higher expectations for digestibility, safety, and overall product quality.

Pets experience continuous changes across life stages—from growth to aging—placing ongoing pressure on nutrition and gut stability. These dynamics can lead to variability in digestion, nutrient utilization, and product performance, making consistent health outcomes increasingly difficult to achieve.

Evonik helps manufacturers meet these challenges with a science-based, integrated approach to pet nutrition and gut-health.

T FOOD

Evonik combines long-standing expertise in amino acids with innovative gut-health solutions to improve how nutrients are utilized, delivering measurable benefits for pets.

Getting the dietary balance right

Balanced amino acid supply is fundamental to delivering consistent health outcomes in pet food. Evonik's amino acid solutions enable pets to receive exactly what they need for optimal metabolism, development, and vitality.

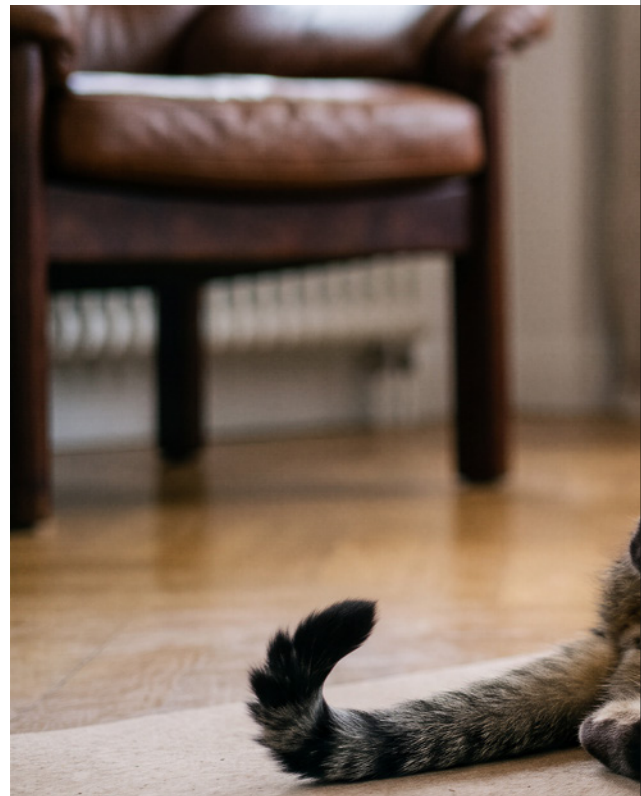

Supports strong muscles

Improve how dietary protein is used, supporting lean muscle development and metabolic balance

Promotes healthy skin and coat

Enables visible benefits such as healthy skin, glossy coat, and overall vitality

Balances modern diets

Compensates for methionine deficiencies in plant-based formulations

Reliable production performance

High purity and stability ensure reliable results, batch after batch

Supports kidney function

Promotes urinary pH control and supports bladder health

Ecobiol®

A stable and well-balanced gut microbiome is essential for consistent digestion, nutrient absorption, and overall pet health. Evonik's probiotic solutions are designed to perform reliably in real pet food conditions, supporting both biological efficacy and manufacturing requirements.

Faster spore out-growth for enhanced gut-health in pets

Ecobiol® is a spore-forming probiotic designed to deliver consistent, measurable improvements in gut microbiota and digestive performance. Due to advanced fermentation technology, Ecobiol® outgrows rapidly in the gut, which means more active probiotic cells, more effective pathogen inhibition, and enhanced gut-health.

It supports a balanced intestinal environment, promotes stable stool quality and digestion, and contributes to reliable functional outcomes across formulations. Its spore-based design ensures stability in processing and effective performance under real feeding conditions.

GutCare®

GutCare® complements Ecobiol® by supporting gut stability under variable and challenging conditions, such as dietary transitions, environmental stress, or changing life-stage requirements. It helps maintain a balanced microbiome, supporting consistent digestion and nutrient utilization when conditions are less stable.

GutCare® contributes to digestive consistency across life stages, promotes long-term gut resilience, and supports reliable performance in dynamic feeding environments. It is designed

to perform effectively under varying dietary and environmental conditions, helping ensure consistent gut function in complex pet food systems.

Sustainability in pet food starts with how efficiently nutrients are used. Evonik supports more sustainable production by improving nutrient utilization, reducing excess inputs, and enabling consistent, high-performing formulations. By combining amino acid expertise with gut-health solutions, we help manufacturers achieve better outcomes for pets while reducing resource use and environmental impact.

Transparent, data-driven sustainability with product LCAs

Evonik provides product-specific Life Cycle Assessment (LCA) data to support informed formulation and sustainability decisions. Our cradle-to-gate approach delivers transparent insights into environmental impact, including greenhouse gas emissions, resource use, and nutrient losses. This enables our partners to quantify and optimize the footprint of their formulations and make measurable progress toward their sustainability goals.

Recognized performance

Evonik's commitment to sustainability is reflected in its EcoVadis Gold rating, placing the company among the top-performing organizations globally. This recognition highlights our strong sustainability management, transparency across the value chain, and continuous efforts to support customers with responsible, future-ready solutions.
