BECAUSE IT'S ABOUT

BALANCE

K-pron® - Precise potassium for performance and balance

Pure potassium source to support rumen buffering and feed intake

Stabilizes DCAD levels in ruminant and poultry diets

Supports high potassium requirements in heat stress conditions

K-pron®

Sciencing the global food challenge™

EVONIK
Leading Beyond Chemistry

K-pron®

THE MOST EFFECTIVE POTASSIUM SOURCE

PRODUCT SPECIFICATION

K-pron® 1 kilogram contains Potassium carbonate hydrate 982 grams
(equal to Potassium min. 470 grams)

Key benefits

The best potassium source

Better resilience to heat stress

Boost flock performance managing the dietary electrolyte balance (DEB)

Excellent metabolic and blood buffer

Direction of use

For all types of poultry

*DEB levels for growing poultry are suggested as;

- Starter 260 – 300 mequi / kg
- Grower 250 – 280 mequi / kg
- Finisher 240 – 260 mequi / kg
- Broiler Breeder Peak lay; 230 mequi / kg, minimum K 0.85%

Packaging

Bag 25kg

Key properties

Classified as a feed material according to European Feed Law

Purely Potassium carbonate hydrate which does not produce heat during mixing in feed

Produced in Europe under FAMIQs / ISO 9001 registered system, ensuring quality and consistency

*Inclusion level of K-pron® dependent on potassium content of other ingredients. Consult your Evonik expert for guidance.
