

# Origin list: Europe

## The following list contains plants from Europe

Botanica obtains the Europe plants from long-term suppliers from different countries. The plants are harvested either from cultivation or in the wild.

Botanica processes the corresponding plants into extracts which are available in different carrier substances (water-soluble, oil-soluble etc.) - see extract finder. These extracts can be used for cosmetic and technical purposes.

Botanica neither performs nor commissions tests on animals. Our raw materials are natural and can vary slightly from harvest to harvest without affecting the quality of the product. Further information can be found in the corresponding specification.

Please note that some plants are not available all year round. Please ask us about the availability. This list is not exhaustive and represents only a part of our plants. If you are looking for specific extracts for your formulation, we are looking forward to your contact.

## Europe (different countries)

English	Deutsch	Français	Latin	Bio
<b>Almond Flower</b>	Mandelblüten	Fleur d'Amandier	Prunus Dulcis	Bio
<b>Black Currant</b>	Johannisbeere schwarz	Cassis	Ribes Nigrum	Bio
