

# Product list: Distillates

## The following list contains distillates

Botanica distinguishes between distillates and water distillates. Distillates / water distillates are obtained through a gentle distillation process. The preservatives used are natural cosmetic compliant sodium benzoate, ethanol, or sugar ferment extract. Botanica distinguishes between distillates and water distillates. Distillates have the INCI designation "... Extract," while water distillates carry the INCI designation "... Water." These clear, colorless distillates / water distillates have a shelf life of 18 months.

The following products can be used for cosmetic and technical purposes.

Botanica neither performs nor commissions tests on animals. Our raw materials are natural and can vary slightly from harvest to harvest without affecting the quality of the product. Further information can be found in the corresponding specification.

Please note that some products are not available all year round. Please ask us about the availability. This list is not exhaustive and represents only a part of our products. If you are looking for specific products for your formulation, we are looking forward to your contact.

## Distillate - in water preserved with sodium benzoate
