

# Topic list: Luxury

## The following list contains luxury-associated raw materials

Luxury refers to behaviors, expenditures or equipment that go beyond the usual measure (the usual standard of living) or about what is considered necessary or reasonable in a society. Roses, as well as other flowers, are associated with luxury, sensuality, romance, beauty, and well-being, and are used in cosmetics, especially in beauty and care products.

Botanica processes the corresponding plants into extracts which are available in different carrier substances (water-soluble, oil-soluble etc.) - see extract finder. These extracts can be used for cosmetic and technical purposes.

Botanica neither performs nor commissions tests on animals. Our raw materials are natural and can vary slightly from harvest to harvest without affecting the quality of the product. Further information can be found in the corresponding specification.

Please note that some plants are not available all year round. Please ask us about the availability. This list is not exhaustive and represents only a part of our plants. If you are looking for specific extracts for your formulation, we are looking forward to your contact.

## General luxury raw materials

English	Deutsch	Français	Latin	Bio
<b>Cocoa</b>	Kakao	Cacao	Theobroma Cacao	Bio
<b>Edelweiss</b>	Edelweiss	Edelweiss	Leontopodium Alpinum	
<b>Golden Kiwi</b>	Kiwi gold	Kiwi jaune	Actinidia Chinensis
