

## Bone-matching biomaterials

Enhance bone fixation medical devices with osteoconductive and mechanical properties

Resomer®  
Composite

## Designed for a broad range of bone fixation applications

Interference Screws

Suture Anchors

Fracture Plates

### A highly flexible selection of standard and custom composites

Our standard line of composite materials includes:

- RESOMER® Composite L 210 S + 25 % HA
- RESOMER® Composite LR 706 S + 30 %  $\beta$ -TCP
- RESOMER® Composite LG 855 S + 30 %  $\beta$ -TCP

Under our RESOMER® Select portfolio of custom polymers, we can also tailor any composite material to match your specific application requirements. Options include the selection of RESOMER® material and type of additive.

### Precise degradation rate profiles

Our RESOMER® portfolio of bioresorbable polymers has earned a strong track record for efficacy, safety and biocompatibility over more than 30 years of commercial use. Leverage our expertise and proven processes for precise degradation rates tailored to your target application.

### Robust mechanical properties

Mechanical properties including elastic modulus to match the natural bone and minimize stress shielding to encourage faster bone healing with reduced inflammation.

### READY-TO-USE and easy-to-process

Supplied as ready-to-use pellets that are easy to process and simplifies the supply chain.
